40. INNOVATIONS IN TEACHING-LEARNING INTRODUCED DURING THIS ACADEMIC YEAR (IN 200 WORDS MAXIMUM)

Mechanical Engineering

The department of mechanical engineering has implemented innovations in teaching-learning and strategy in various forms.

Some key points are following:

Department of mechanical engineering will review our curriculum and create more space for innovation in education, for multidisciplinary activities (such as open course of robotics and product design) and for student's engagement with teachers, with each other, and with the world outside of institute. Teaching is intended to portray more interactive, more supportive, more challenging and more rewarding for students. For attainment of these activities our faculty have been trained in advanced pedagogy via training in different IITs.

Department will be offering online and digital enhancements to our curricula, evidence-based pedagogy, community building and focus on teaching global challenges. By utilizing the digital and online technologies to enhance a sense of collaboration and community between students on campus, to better apply interactive teaching techniques, and to expand possibilities for creating an international classroom. Teachers, lessons, and curriculum have to be flexible. We have to get our students to think and ask questions.

During the past several months in view of the pandemic the teaching learning has become completely online and our faculty members have groomed themselves in a way which has proved effective for online teaching. The use of writing pad, open board and also more use of presentations by the faculty members has made online teaching more productive. The use of virtual labs by the faculty and students for conducting experiments has gained popularity and has become important part of online teaching and has made online teaching fruitful. these innovations in teaching learning has helped in achieving better results as far as the online teaching is concerned.

Electrical Engineering

1. Converting Black board Teaching into online teaching

- ❖ Online Classes through Zoom/ Google Meet
- ❖ Online Quizzes through Moodle
- ❖ Online Assignments submission
- ❖ Online conduction of Practical viva and internal assessment exams.

2. Use of open source software

- ❖ Use of "8085 Virtual Simulator" in teaching
- ❖ Use of Latex in writing project reports.

❖ Complex Engineering Problem Solving

Electronics Engineering

Faculty Innovations in Teaching and Learning: Activities of the department towards improvement in teaching-learning are indicated in the office records as well as on college website. They are open for reproduction or for further improvement or review or critique. Some of the innovative means adopted by the faculty in T & L are:

- Making use of PowerPoint Presentation, wherever necessary.
- Technical videos for demonstration of certain concepts or functioning of the devices.
- Use of tools like MATLAB to demonstrate the concepts through simulations.
- Use of E-learning resources like NPTEL lectures, online journals and online lectures like MOOCs for effective learning.
- Providing question bank with short answer questions and Quiz questions.
- Hands-on practice in the laboratories for the better understanding of the concepts taught in the theory classes.
- Visits to nearby industries for exposure.
- Project exhibitions and poster presentations.
- Student seminars.
- Project based learning
- Shared learning.

CSE

The following are the innovative teaching learning approaches that have been implemented during the 2020-2021 session.

Online and interactive teaching of theory classes.

Online virtual lab conduction

Lectures and lab sessions are recorded and shared with students so that they can watch and learn at any time.

Weekly Online Quizzes and Assignments.

Weekly doubt clearance classes (remedial) are conducted.

Job Oriented and Skill based Internship and real time projects useful for society.

In house MOOCs development for thrust area subjects

Chemical Engineering

Following Points Are Introduced During This Academic Year For The Betterment Of The Students:

(1) Active Learning

Active Learning Techniques Have Been Used To Engage Students And Encourage Innovation And Creativity.

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR

(A Govt. Aided UGC Autonomous Institute Affiliated to RGPV Bhopal)

(2) Friendly Environment

Students Have Been Encouraged To Create A Friendly Environment With Faculty And To Ask Questions / Queries Related To The Subject.

(3) Social Media Platform

This Forum Always Connects The Students With Faculty Members. Students Can Ask The Question/Queries And At Any Time Can Participate In Healthy Discussion With Colleagues And Faculty Member. This Is Also Helpful For Any Prior Announcement To Faculty Member.

MAC

Department has introduced ICT techniques during pandemic situation of COVID 19. Department has used Google meet, Zoom, Veikk writing pad, You Tube video. Using ICT classroom environment has been stimulated, brain storm session has been conducted and real world problems analysis has been discussed in the class. Department has used e-learning techniques as incorporating pictures, videos, charts and PPTsin order to stimulate creativity in the class and effective and innovative delivery in the class room. Using various ICT techniques professors have created their own study materials, pictures and videos so that teaching becomes more interactive, interesting, easy and effective.

Humanities

Administered professionally assignments and quizzes in the classes in online mode via moodle so as to ensure student participation without stressing them to worry about marks.

Exercises were designed to take place in class itself and were evaluated only on basis of participation and not performance so as to emphasise learning and not scoring marks.

The said task was completed in online mode itself and during the classes through the use of moodle and available features.

Example: After 30-40 Minutes of Teaching Students were asked to respond to some Questions From What Has Been Taught To Them During The Session in Online Mode and On Spot. The Students were evaluated only on basis of their participation and not on basis of performance. The Practice was incorporated as a regular feature throughout he classes.

Applied Science

The faculties have incorporated innovation through on line teaching and virtual laboratories. integration of subjective knowledge with on line resources such as you tube videos, interaction with students, access to online study materials have been implemented by the faculties in the department.

Architecture

The institute analyzed and examined all the options to steer the current semester in view of Covid - 19 pandemic and came up with ideas which kept in mind the associated restrictions and the importance of academic curriculum.For that online sessions through Zoom, Unacademy, remedial classes and counselling were provided as per schedule which was designed keeping in mind the state of students, and availability of internet. Every year is engaged in

some or the other productive activities, projects and summer workshops, which are designed to provide knowledge but through innovative and practical methods that can be very easily done by students. The agenda was to make student to feel that they can do something and be productive while being restricted. Even the exams were conducted in the same way keeping in mind the associated factors and students. Other teaching aids were also welcomed open heartedly as Institute's prior aim was to impart knowledge in the students. This pandemic also taught us the importance and privileges of being able to attend college, do things normally and importance of learning.

BEST PRACTICE – 1

Title of the Practice

Identification of the slow learner students from marks of Mid -Sem Examination and efforts to improve them

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR

(A Govt. Aided UGC Autonomous Institute Affiliated to RGPV Bhopal)

Objective of the Practice	The objective of the 'Open Book Mid-Sem Examination' is to equip the students with intellectual abilities and skills. This will enhance the ability of students to quickly find relevant information and then to understand, analyze, apply knowledge and think critically. The student will focus on understanding of concepts involved in the subject along with its theory part.
The Context	The objective of the 'Open Book Mid-Sem Examination' is to equip the students with intellectual abilities and skills. This will enhance the ability of students to quickly find relevant information and then to understand, analyze, apply knowledge and think critically. The student will focus on understanding of concepts involved in the subject along with its theory part.
The Practice	This open book in the mid-semester exam has been started for Power Electronics (6th semester) and Electrical Drives (7th semester). During exams students are permitted to take help from books, notes as well as Smartphones too. Power electronics is a hybrid paper that includes the idea of basic electrical engineering, material science, network theory, control systems, basic electrical machines, and power systems. Also it includes control techniques of devices like SCR, BJT, and MOSFET etc. Due to this, the 6th semester students most of the time get confused and do not answer correctly. Similar is the case with the subject 'Electrical Drives'. By conducting 'Open Book I Mid-Semester' the students who are a little bit confused will get some support in giving answers correctly. It also reduces the pressure on the mind of the students and motivates them. Also it is the best way to remove the fear of exams.
Evidence of Success	As expected the result analysis shows that the high score percentage of the students has been increased drastically and the fail percentage backlog of the students has been reduced.
Problems Encountered and Resources Required	As this was a new concept, at first students were afraid of this, but later on their interest increased in learning the subject and they enjoyed it.

BEST PRACTICE – 2

Title of the Practice	Identification of the slow learner students from marks of Mid -Sem Examination and efforts to improve them
Objective of the Practice	The performance of some of the students are poor in Mid – Sem Examination and consequently they obtain less marks in these Mid – Sem Examinations. The objective is to identify these students on the basis of marks obtained. Thereafter, in the second step a meeting is organized with them to find out their reasons for obtaining fewer marks and to take corrective action accordingly.
The Context	The performance of students may be improved in second Mid – Sem Examinations, End Term Examinations and in competitive examinations as well

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR

(A Govt. Aided UGC Autonomous Institute Affiliated to RGPV Bhopal)

The Practice	Mid- term result analysis will be done according to following format:				
	Students Marks	0-6	7-12	13-16	17-20
	No. of students				
	<p>1. Students of column I and II will be considered as the slowest learner students and slow learner students respectively.</p> <p>2. Meetings done to find the difficulty of students. Personal Attention Classes are conducted for these students. Following steps are taken to help them:</p> <p>Learning material of the students checked and adequate learning material provided.</p> <p>Revision of course contents as per their need.</p> <p>More assignments, checking and guidelines for improvement.</p> <p>The best A/B shown and discussed among students of column I and II.</p>				
Evidence of Success	This practice has recently started therefore it will take time to analyze its impact; however it has increased interest and confidence of students in the subject.

The Context	<ul style="list-style-type: none"> • In subject like language a student has to be aware of the marks and grades he has secured so that he can amend his mistakes. • Student is well aware of his performance and also learns how to improve the same in coming semester
The Practice	The department from a long time now has been in practice of evaluating a students' performance (mat it be Mid Semester, Internal Assessment, end semester practical Exams, <i>viva vocé</i> , and other similar tests) on spot and in full cognizance to the student, so that student is well aware of the grades he/she has been awarded.

Title of the Practice	Reformed Teaching Learning Process
Objective of the Practice	1. Student Centric Learning 2. Activity-Based Learning 3. Project-Based Learning 4. Technical Quiz 5. Mentoring

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR

(A Govt. Aided UGC Autonomous Institute Affiliated to RGPV Bhopal)

The Context	<p>As we found a few difficulties in the traditional method of chalk and talk teaching, we have set up the classroom as student-centric namely Reformed Teaching Learning (RTL) process. In this RTL method, the interaction by students has improved considerably.</p> <p>As this new process is connected with activity-based learning such as role-play, students get more space to interact with teachers and classmates. Further, PPTs, Videos, OHPs and short seminars are being used in the RTL method that results in easy understanding of the concepts by students.</p> <p>The RTL method provides detailed learning to students and reduces them to initiate a project on the basis of what they have learned in the classroom.</p> <p>To get in-depth knowledge in subjects, a technical quiz is conducted in each subject which helps students to have specified learning.</p> <p>The teachers meet students periodically, collect the pros and cons of this method and counsel them to remove the difficulties in their academic performance; this method is called 'Mentoring system'; students' personal issues are also discussed and proper guidance and support are provided to ensure the comfort of students in the campus. The primary focus of the RTL method is to give students a wide-ranging knowledge, exceptional creativity, and more comfort and to bring out their hidden potentials into the limelight</p>

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR

(A Govt. Aided UGC Autonomous Institute Affiliated to RGPV Bhopal)

The Context	<p>The Department conducts a training program for 2nd and 3rd-year students every year on software training such as Autodesk, Adobe, Microsoft.</p> <p>The Department takes sports and cultural program to provide exposure and boost the hidden talents of the students. Interclass badminton competition in the department held this September. Besides study, the students of all 5 years participate in various cultural programs throughout the year.</p> <p>Due to the stiff competition during placement interviews, students must perform well not only in technical interviews but also in personal interviews. Apart from technical knowledge acquired through the regular curriculum, students should also exhibit soft skills during campus interview and during their career. Soft skills programs are conducted by experts for a week or more than that during first and second semester of second and third year. Students actively participate in these programs and their soft skills are improved. The programs included in a student's development are Problem-solving activities, creativity, professional ethics, personality development.</p> <p>Summer is a time of freedom and hope, where students pause from the daily grind of studying to enjoy the sunshine and some carefree merrymaking. There are summer classes, but many students desire a break from the studies during the days of sunshine and warmth. We have scoured the nation and found some of the most interesting and unique summer opportunities available, and many combine all the elements that make for a great summer break without the thought of falling behind. The program is for 1st and 2nd-year students, unique and interesting – not just summer classes, and at least four weeks. The recent workshop on Bamboo construction was initiated in the month of May 2019 by the 1st-year architecture students.</p>

BEST PRACTICE – 5	
Title of the Practice	Workshops in the Department
Objective of the Practice	<ol style="list-style-type: none"> 1. Active engagement of participants during the workshop 2. Modelling effective pedagogy: 3. Giving participants time to interact and share experience/knowledge 4. Emphasizing practical applications: 5. Giving participants time to make progress on a specific task that connects the workshop topic to their teaching:
The Context	<p>Nothing is deadlier or less effective than a workshop where participants do not participate. The goal is to give people an opportunity to participate actively in every session using a variety of techniques: small group discussion, large group discussion, short problem-solving tasks, and involvement of participants in trying out activities, individual or paired work at the computer, and scheduled thinking and writing time.</p> <p>The most successful workshop sessions are those taught with good pedagogy in mind and that least successful sessions are those where a presenter simply stands up and talks. Be vigilant about how presenters structure sessions with the goal of using effective pedagogy in all sessions.</p> <p>Participants bring valuable experience and ideas to workshops. Structured mechanisms for sharing experiences and expertise must be an integral part of every workshop program. Support this aspect of the program with unstructured social time that supports the development of networks that will last beyond the workshop.</p> <p>An emphasis on practical applications and strategies is an important aspect of effecting change in teaching practice. Workshop participants frequently comment on the value of examples of what works and what doesn't. Future workshops will continue to provide practical examples.</p> <p>Time to work individually during the workshop allows participants to reflect and to make progress on adapting workshop content to their own needs. This can be effectively supported during the workshop by providing opportunities for participants to work one-on-one or in small groups with workshop leaders. Workshop programs will include scheduled work and reflection time for participants.</p>
The Practice	-
Evidence of Success	Departmental record
Problems Encountered and Resources Required	Lack of resources and funds in the department

सर्वधर्म प्रार्थना : न छूटे अपने का साथ संक्रमितों को मिले स्वास्थ्य लाभ

नईदुनिया द्वारा 14 जून की सुबह 11 बजे होगी सर्व धर्म प्रार्थना

ग्वालियर। (नईदुनिया प्रतिनिधि)। कोरोना संक्रमण के इस दौर में हममें से कई लोगों ने किसी न किसी अपने को खोया है। किसी के सिर से पिता का साया हट गया तो कोई ममता की छांव से वंचित हुआ, किसी ने अपने भाई को हमेशा के लिए खो दिया तो किसी के मन में बहन के दुनिया से विदा हो जाने का दर्द बसा हुआ है। नाते-रिश्तेदार, दोस्त, गुरु इन सभी को किसी न किसी ने खोया है। अभी भी कई लोग ऐसे हैं जो इस संक्रमण से जंग लड़ रहे हैं। इस मुश्किल दौर में हम सभी का कर्तव्य है कि एक-दूसरे

का सहारा नमें। अपने-अपने स्तर पर हर कोई यह प्रयास कर रहा है। एक कोशिश हम सब कर सकते हैं और वह है 'प्रार्थना'। नईदुनिया द्वारा 'सर्वधर्म प्रार्थना' आयोजित

की जा रही है। 14 जून की सुबह 11 बजे आयोजित होने वाली इस प्रार्थना के लिए आपको कहीं जाने की आवश्यकता नहीं। आप चाहे अपने कार्यालय में हों या घर पर, आप जहाँ भी हैं वहाँ वो मिनट का मौन रखते हुए ईश्वर से प्रार्थना करना है।

यह प्रार्थना परिचित-अपरिचित, अपने-पराए, जो इस दुनिया में हैं उनके लिए भी और जो इस फानी दुनिया को छोड़कर जा चुके हैं उनके लिए भी होगी। रोगी के बेहतर और जल्दी स्वस्थ होने की प्रार्थना और दिवंगतों को आत्मा की शांति के लिए प्रार्थना तथा इस विषम दौर से गुजरने वाले परिवारों के मांल की प्रार्थना तो हम कर ही सकते हैं।
